Vehicle Inspection Reports

Vehicle Inspection reports detailing before and after test results using Xtreme Fuel Treatment™ for Arizona test # 7164692. The first test (conducted on 07/26) indicates a failure to pass the State mandated emissions test. After using Xtreme Fuel Treatment™ for approximately two weeks, the second test shows that the same vehicle received a “pass” result for the same test. This result was achieved without any other adjustments or repairs being made to the engine. The second report from Utah shows a passing emissions test for a truck that had 122,917 actual miles without any other repairs or adjustments other than using Xtreme Fuel Treatment™ regularly in the fuel consumed. Xtreme Fuel Treatment™ has been referred to by many as a ‘tune-up in a bottle’.
